Ingrid Chavez - London

I am in love with Solus products. Their design, quality and service are outstanding. We gladly recommend Solus Products. They are ZEN vibe providing a peaceful and relaxing environment.

Marc Mendoza - London

Enjoyed the process with these guys - bought 3 items (2 x water, 1 x fire) so wasn't a cheap buy, but when you see it in situ you realize it's worth it. They enhance the garden and were one of the best investments we made. The service and comms from the team at Solus was excellent and they answered any questions quickly and constructively.

**Museum-Quality
Crating**

Guy Jones - Gloucestershire

We specify Solus products as part of our design and build package. We find them high quality, beautiful pieces which are easy to install a very reliable. The company is also very efficient and easy to deal with. Would recommend very highly.

Ben Helps - West Sussex

I have used Solus water features and fire pits in my garden design business for my clients. They are a product of great quality, with a pleasing aesthetic. They can be featured in various styles of well designed gardens, and deserve an appropriate setting and backdrop to show them off to their full potential.

**At Solus we design, build, test, certify, sell, service and warranty our products.
We are proud of our products and what we do.
We are Solus.**

Hemi (26, 36 & 48)

Phil Brown - Buckinghamshire

We recently did a major garden makeover and were looking for just the right fire pit. Came across Solus and was really impressed with the reviews, so visited their U.K. showroom, loved the product, and received first class service from Brad and Claudia. They helped us settle on the right product, managed the ordering process, and kept us fully updated at all stages, despite the Covid impact on shipping and deliveries. The fire pit is really beautiful, whether lit or not - highly recommended. Can't wait to get more use out of it as we enjoy these balmy summer nights.

Stephanie Vizer - Wiltshire

My fire pit arrived and is great!! Now need the British summer time to start!! Claudia is a total gem...Any instructions...explanations...extras that I wanted were literally shipped the next day!! She was super efficient and so helpful!! Fantastic!!

Refined sculptural presence

Available in three sizes to suit any space, these round fire bowls add heat, ambience, simple sculptural beauty and an architectural statement. Our 'cross-jet' and ethanol burners provide ample flames and are built to last. Three fuel types with manual or electronic start options allow these bowls to be used in all outdoor situations. Each fire bowl is available in 12 colours and can be paired with a full bed of Firestones, a Hardwood Tabletop, a Metal Tabletop/Drinks Ring, or an All-Weather Fabric Cover for added beauty and functionality.

The Hemi 26 is ideal for intimate outdoor spaces. Hemi 36 creates an instant gathering place. Its form shows off the natural beauty of our concrete and provides a focus for residential and commercial environments.

Hemi 48 is our largest round fire pit. It commands attention and its presence fills any space. Designed in response to repeated requests for a fire pit that would be comfortable in both large scale commercial and intimate residential spaces, the 48" makes a strong visual statement.

Product variations & dimensions

Sizes: (dia.) x (h) x (base)

26 660mm x 305mm x 254mm

Halo (36 & 48)

Maitanne Hunt - London

Solus Decor supplied one of their firebowls for a roof terrace we were installing and the customer service I received from them was brilliant. Prompt and clear communication, frequent updating and a detailed installation manual made it a stress-free journey - and the product has transformed this corner of the terrace. A very positive experience throughout.

Andrew Papastefanou - Surrey

Great quality product and excellent, responsive customer service in the UK

Adam Bailey - Somerset

Great product with fantastic service. Best firepit without a doubt!!

Square sensuality

Crisp outer edges that curve smoothly into a round fire opening give a modern sculptural feel. The Halo shows off the striking and subtle qualities of our concrete. This allows the flickering flame to reflect off its polished surface, inviting people to gather around.

The Halo rests on a square base to give it a coffee table height and functionality. This works well when used in conjunction with standard seating.

The Halo is available in two sizes (36 & 48) for small or large spaces and is suitable for residential and commercial installations.

A Metal Tabletop is available which allows the firepit to be a fully functioning table when unlit.

Allan Rienecker - London

Our new Solus Hemi 36 fire pit with the metal ring and table top has transformed our patio! It's expensive but the beautiful design, quality and functionality are all worth it. It provides a lot of heat on cool evenings and the metal ring stays cool enough for drinks and small plates. Brad at Solus Decor in Surrey was also very responsive in helping us get it connected during lockdown when there were a shortage of qualified gas engineers in our area.

E Jeffreys - Surrey

We are delighted with our Solus water fountain - we love its clean lines and contemporary look. Brad was very pleasant to deal with, he arranged for it to be delivered when and where we wanted it and even came round to the house to help lift it into position and install it.

Firetable

Patricia Fox - Hampshire

At Aralia, we have included Solus Fire Tables and Scupper Water features in a few of our designs recently - good quality, lovely design, nice clean lines.

Ian Jenkins - London

I've both a fire pit and a water feature, really pleased. Super products, great service and really highly recommended.

Owen James - West Yorkshire

Great after sales assistance, would certainly recommend the company, Fabulous water feature products.

Charles Proctor - Berkshire

Really happy with our water feature - great quality product and service from Solus was excellent! Lots of compliments from friends and family!

A clean and modern fire table

The Firetable is a modern concrete fire pit that is sturdy, functional and at coffee table height. The simple, smooth concrete top is made up of four sections that slope towards the fire opening and reflect the flame light. The sensual top sits above a rectangular concrete box that houses the working parts of this firepit. This combination creates a fire feature that works in a contemporary or traditional garden setting.

Placed alone or in pairs end to end, the clean lines and straight forward design of these fire tables makes them at home in a variety of environments from spare modern to rustic traditional. Appropriate for use in both commercial and residential projects. All of our natural gas and propane fire pits are fully certified appliances and each one comes with a warranty on craftsmanship and performance.

Our cross-jet burners position the flame above the fire pit which results in more efficient use of fuel and transference of heat. The jets are oriented for efficiency and maximum flame height. Fire stones can be used to shape the fire for a more 'natural' look. Manual and adjustable auto start options allow you to adjust the flame height and heat output to suit your needs.

Product variations & dimensions

Firetable With Glass Wind Shield

Kathryn van Rooyen - London

My Hemi fire pit from Solus Decor is simply beautiful. The product is even better in life than the pictures and so simple to install. The directions and videos provided are excellent and it looks stunning on my terrace.

The team could not have been more helpful or efficient they were great. Not to mention patient with my many questions! I highly recommend them.

Christine Wilkie Garden Design - Buckinghamshire

Just wanted to say how pleased we are with the Solus water feature recently installed in a client's garden. Really looking forward to specifying more of your wonderful water bowls and firepits in upcoming garden design projects. of qualified gas engineers is our area.

Tented All-Weather Fabric Cover

Tavolo

Gary Mellor - London

Really great fire tables.

As a gas engineer, specializing in installing and maintaining gas fire-tables, I've installed quite a few Solus. They are a robust quality product.

Made in Canada, shipped to the UK, they have a showroom in Cobham if you care to view before you buy.

Highly recommended.

Tony Spencer - Somerset

Great product, with friendly and efficient service from Brad.

Abbi Maloney - Surrey

We bought both the fire pit and water feature which we have been so excited to use, although the fire pit isn't the most straight forward installation but we have got there in the end, with the help of Brad & Team! Thank you guys. Fantastic products and service.

Big in size, huge in personality

The Tavolo was created after conversations with designers and clients who wished for a fire pit with a larger table area. This stylish piece showcases a contemporary cantilever guaranteed to impress.

This significant piece of furniture lends itself to both form and function. Built to suit any setting; its rectangle shape and smooth polished surface extends proudly with an offset from the fire tray.

The area directly surrounding the fire has a slightly bevelled edge which draws your focus to the flame. The table areas surrounding the fire remain cool to the touch, making it our most interactive fire table option.

Tavolo With Wine

Tavolo Close Up

Glenn Carrington - Straffordshire

The selection of fire bowl/pits to choose from is vast to say the least and as for customer service Janet could not of been more helpful.

She gladly chased up any queries I had and got back to me when she said she would. The product itself is stunning and really complemented my project, it arrived blemish free and on time. I'd like to say a big thank you to the team and would highly recommend them to anyone with decent taste. I am currently working on a new project and am working with them again.

Plunket Gardens - London

The water bowl provides such a stylish contemporary feature in our recent Kensington Glade Garden. The owners have found it easy to maintain and enjoy adjusting the fountain pressure to create a range of sounds and light effects. Thank you

Linear (Single, Double)

Dramatic Divider

The Solus Decor Linear Firepit is a colossal 1183mm long wall of fire, designed for heat and visual impact. Its minimal form is complemented by the smooth pebble detail on top that allows the product to traverse the line between being a functional garden product and work of art, fit for admiration.

This firepit can be used as single height or stacked for double height; either configuration will create a powerful impression. The double-height Linear can create semi-private areas, or act as a dramatic divider between areas for drinking and dining.

The Linear Fire Pit can hold its own as the focal point of a patio or courtyard, or can draw you into an entrance or walkway. It is perfect for providing warmth and atmosphere at a garden party yet, due to its slim line form, this fire feature will not take up valuable seating space. It is unmistakably Solus.

These sizeable linear units make them ideal for use in high-end residence as the feature fire that separates the deck from the pool, or placed at the end of a pool for heat and visual impact. In a commercial location they could be used as an elaborate partition to create separate zones within an outdoor terrace.

The Linear is available in ten different colours and fuel sources include either natural gas or liquid propane (bottled). At 31kW, it is a significant heater which can be adjusted for flame height and heat output. It is available with either manual ignition with adjustable flame and safety shut off device or electronic start with adjustable flame and safety shut off device.

The Linear, like all Solus products, is made in Vancouver, Canada and shipped all over the world.

Product variations & dimensions

Firestones

Falken Reynolds Interiors - Vancouver

Solus' products are simply the highest quality and their service is always amazing. We are very proud to have such a great company in Vancouver and to use their products here and abroad.

Susan Green - London

We wanted a quality water feature. We found Solus to be extremely professional from start to finish in providing information and helping with samples, to ensure we had the right colour to blend with the rest of our landscaping. Solus provided unprompted updates re delivery and have helped with every piece of information that we have ever requested. Their customer service is second to none. The end result is a beautiful water feature that is a centre piece in our garden, perfect to watch and so lovely to listen to.

Linear Close Up

Water Dome (26, 36 & 48)

Nikki Hollier - Worcestershire

Beautifully designed and made water feature which will compliment any garden. So easy to install too (just plug into a garden electric socket). I chose the Dome 26 in Halva colour and received so many lovely comments from my friends and neighbours. Thanks Solus for the great customer service too and so lovely to listen to.

Benjamin Taylor - Hampshire

The water feature is a perfect addition to our garden. A subtle sound with big visuals. Easy to install, wonderful sales team and aftercare.

As a landscaper myself I will be recommending this team.

Reflective and meditative

These water features have polished metal domes that appear to float inside the concrete vessels. Water flows up through the center of each dome to run over the reflective surface of the hand-spun metal and then flows off the edges into the surrounding water creating a soothing sound.

Like all our concrete pieces, each metal dome is handmade and unique. The variations, inconsistencies and undulations characteristic of hand-spun metal create the beautiful water movement and reflections that define these water features.

Our concrete bowls provide a solid aesthetic counterpoint to the shine of the domes and the fluidity of the water, while functioning as impermeable containers. Every dome is attached to a support which holds it securely inside its concrete vessel. Appropriate for use both indoors and outdoors for residential and commercial installations.

Lindsay Lloyd - Essex

I have just had my Solus bowl installed and I am thrilled with it. The sound of water is just perfect - and it is good to know that I can adjust the height of the water flow. I have installed the bowl on my patio and will start to plant the flowerbed it stands on. It is all very exciting and I can't wait for my first visitors to see it in action!

Ros Hetreed - East Sussex

Our Solus Dome water feature, found at the Chelsea Flower Show and now positioned on the rear terrace, has a wonderful tinkling echo and can be heard across the entire length of the house when the double bifold doors are open, also in the bedrooms above. Its simple but tasteful design could fit anywhere, inside or out. We are delighted with it.

Rippling water refracts light on metal dome

Accessories

Guy Jones, Emotive Landscapes - Cheltenham

We specify Solus products as part of our design and build package. We find them high quality, beautiful pieces which are easy to install and very reliable. The company is also very efficient and easy to deal with. Would recommend very highly.

Maggie Schneider - North Vancouver

We have been looking for a firetable for a while but found that many did not produce enough heat. The townhouse where we live has a Solus fire pit on the rooftop so we thought we would give it a try. It is a costly fire bowl but well worth the quality and durability, as I believe it will last for many years. We have seen many at the local barbecue and hardware stores but nothing compares to the quality of the Solus bowl. We were also very impressed with the customer service. Graham was always quick to respond to any questions and provided us a few quotes in order to provide us with the best option for us. Shipping was also very communicative and willing to work around my schedule in order for us to receive the product. I was very pleased with the whole experience and I'm now enjoying the beautiful fire bowl. It is certainly attracting a lot of neighbors attention!

All Metal Tabletop with Drinks Ring (optional)

Metal Tabletop (Halo series)

Hardwood Tabletop (Hemi series)

Jon R Bailie - Chichester

We bought a Solus Firecube earlier this year. It's a beautiful looking product, it's very easy to set up and to use and it's been an effective source of heat when we have been sitting in our garden in the evening. The people at Solus kept us informed as to when our Firecube was going to be delivered and also followed up with us after delivery to ensure that we were happy with it. All in all, great client service.

**Edward Bash
- Dalmatia Landscape Design**

What is it about the Canadians, so friendly and relaxed, but able to deliver on craftsmanship and customer satisfaction. I have ordered fire bowls for clients on two projects. The web site is great because I am able to show clients photos and spec sheets at meetings. Staff is friendly and easy to talk to, but take care of business as well. I am very happy with quality and service.

Len Chaston - Vancouver

The best in the business. We purchased the 36" Hemi. Love it. Beautifully built. Works like a charm. Simple beauty. Timeless.

Glass Wind Shield

All-Weather Fabric Covers for all models

Firestones – refractory concrete ‘river rock’ style stones specifically suitable for live fire

Product Colours

Halva:

Varies from oyster to bone. Tends to a slight cream tone. Warm white.

Halva

Portland

Portland:

Natural concrete colour. A mid-tone gray with slight green undertones.

Linen

Nutmeg

Linen:

Light beige. Warm undertones approach limestone.

Nutmeg:

Dark beige. More brownish than linen. Think walnut shells or whole nutmegs.

Portobello:

A lighter mid-tone colour with a light olive undertone. Dark mottling makes this an intriguing colour.

Portobello

Arbutus

Arbutus:

A rich terra-cotta colour. Very arresting.

Nori:

A pastel-ish green/grey. Makes one think of the sea.

Nori

Truffle

Truffle:

A warm chocolate brown. Can vary from lighter to darker but is a darker tone.

Shiitake:

Very dark-toned grey with a warm brown undertone.

Cinder:

Our darkest charcoal grey with a slight warm undertone.

Shiitake

Cinder

Rosé:

Akin to a very lightly dusty rose, or your favourite bottle of Rosé

Pistachio:

The Statue of Liberty which served as inspiration for this vibrant yet muted colour.

Please note that colours shown here are only approximate. Every batch of concrete is slightly different and exhibits unique tonal variations.

Please request actual concrete samples to confirm colour choice.
